

Preliminary User Order Webpage

Tuesday, October 28, 2014 11:25 PM

The image displays three overlapping screenshots of a web form titled "Report a maintenance issue". The form contains the following fields and options:

- What is your name ?
- What is your phone number ?
- Where is the location of the issue ? **Biological Science** ▼
- What is the issue related to ? **Electrical** ▼
- What's the problem with it ? **Power Out** ▼
- Where or which one is it ? **Class Room** ▼
- When should this job begin? (optional)
- Is there any additional details you would like to add ? (optional)
-

Red arrows indicate the sequence of selections in the dropdown menus across the three screenshots:

- Screenshot 1 (Top):** Shows the initial state with "Biological Science" selected for location and "Electrical" for issue type.
- Screenshot 2 (Middle):** Shows "Power Out" selected for the problem, with a dropdown menu for "Select Location" open, listing "Albin O. Kuhn Library" and "Lecture Hall 1".
- Screenshot 3 (Bottom):** Shows "Class Room" selected for the location, with a dropdown menu for "Select Problem" open, listing "Power Out", "Elevator Down", "No Lights", and "Switch Doesn't Work".

At the bottom of each screenshot, a timestamp reads: "Tue Oct 28 2014 23:27:32 GMT-0400 (Eastern Daylight Time)".

my challenge for this preliminary process are setting up the selection box to populate in accordance with the prior selection.
